FOR IMMEDIATE RELEASE

SolidPartners' VP of Development to Demonstrate New Chinese Language Version of 4G:PLM at SVIEF Chengdu *Press release*

CHENGDU, China, June 21, 2016 — Edward Conroy, VP of Development at SolidPartners and product lifecycle management (PLM) industry expert, will speak at Silicon Valley Technology Innovation & Entrepreneurship Forum (SVIEF) Chengdu on June 24, 2016. He will also demonstrate the upcoming Chinese version of 4G:PLM, a powerful but cost-effective PLM solution for manufacturers of all sizes.

This sub-event of Global Innovation and Entrepreneurship Fair 2016 in Chengdu, China, will help build a high tech ecosphere between China and the United States.

Past SVIEF speakers include Apple co-founder Steve Wozniak, former president Bill Clinton, San Francisco mayor Edwin M. Lee, Xiaomi CEO Jun Lei, and many other notable leaders in the technology community.

From SVIEF Chengdu's Eventbrite event page:

From the Internet of Things to the Internet of Everything, the world is more connected than ever. Smart devices, wearable, VR/AR, 3D printing, robotics, driverless cars and other innovations have made impossible to possible in a variety of ways.

About Edward Conroy, VP of Development at SolidPartners

With decades of experience in PLM, Edward Conroy has recently completed projects at several Bay Area companies including Google and Silver Spring Networks. He currently leads PLM product development for SolidPartners from his home base in Asia.

About SolidPartners, Inc.

SolidPartners has nearly 20 years' experience assisting engineering and manufacturing companies quickly navigate the product development process through CAD data management and BOM (PLM) and Workflow Management solutions. We provide simple yet robust solutions designed, developed,

packaged and priced to assist small and medium sized companies gain a competitive advantage by using Product Data Management (PDM) and Product Lifecycle Management (PLM) tools.

SolidPartners products include:

- 4G:PLM, a Simple, Powerful, and Affordable Product Lifecycle Management (PLM) solution specifically developed for small to medium-sized (SMB) manufacturing companies. It is a Master Data Management tool which manages Product Structure (BOM), Approved Vendor and Manufacturer Lists (AVL/AML) and the change process (ECO/ECN).

4G:PLM™ manages product data through the entire product process at a fraction of the software, implementation and on-going support costs of other systems.

- Activault is a simple, powerful and affordable CAD Data Management (PDM) tool completely integrated within SolidWorks. It manages SolidWorks files in a secure vault, provides check-in and check-out functions as well as lightning fast search capabilities. Activault provides centralized file management of all SolidWorks files types as well as other Windows document formats (Word, Excel, PDF, JPG, etc.). It eliminates the risks of overwritten files when multiple engineers work on the same assemble. It also manages versions and revisions to eliminate errors caused by engineering or manufacturing personnel working with incorrect revisions.

Activault® is powerful enough to support large groups of engineers working at a single site or distributed across multiple locations. However, it is simple enough to be implemented and configured in a single day.

- SolidParts™ is a \$200 SolidWorks Gold Partner product. It contains standard parts library created through SolidWorks configurations. It includes standard fasteners as well as electrical and piping components.

SolidPartners -- Enterprise software without the enterprise price.
